LANmark-OF Plug&Play Patch Panels

LANMARK-OF PLUG&PLAY BLANK FILLER 5X

Aginode Ref: N441.2MBP

- Blind plate to fill up unused positions in the Plug&Play Optical Patch Panel

The Aginode' Plug and Play patch panel can hold up to 4 MPO modules.

Often these 4 positions are not completely filled up at the start of a data center, but kept for possible extensions in the rack.

The blind plates are then used to give the patch panel a finished look.

STANDARDS

ISO/IEC 11801

All drawings, designs, specifications, plans and particulars of weights, size and dimensions contained in the technical or commercial documentation of Aginode is indicative only and shall not be binding on Aginode or be treated as constituting a representation on the part of Aginode.
