# Simplify & scale up

Discover the power of **LANactive**

Nexans

# A smart & flexible fibre optic-based network concept.

Passive fibre cabling & active switches are combined to provide Gigabit Ethernet services from the central core switch to an FTTO switch & from there to end user devices.

Active and passive equipment & one software platform to manage it all.

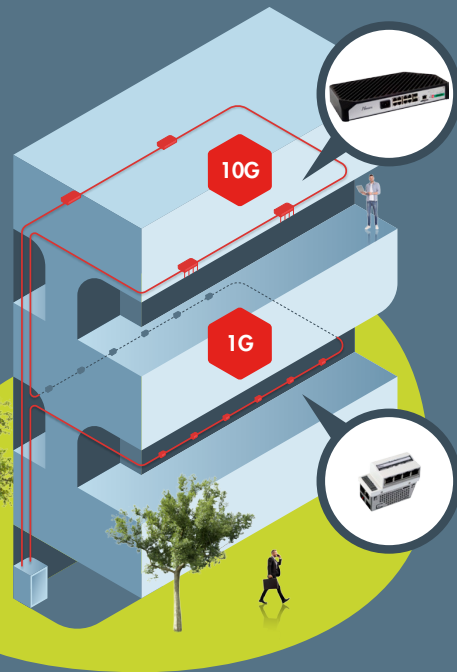

Fiber optic cabling

Active network switches

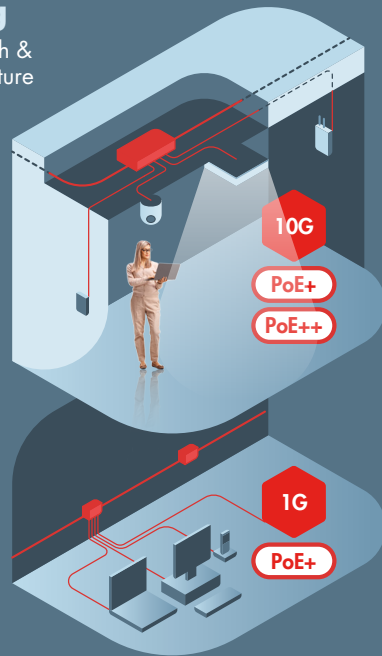

LANACTIVE Manager

## Digital Ceiling

Deliver high bandwidth & power for current & future smart buildings.

## Fibre To The Office (FTTO)

Deliver data & power for a modern & future-proof office environment.

# Improved OPEX, CAPEX & TCO.

Less space & fewer components needed

Optimise installation time

Enhanced energy efficiency

Scale up with ease

Better power & data delivery

Enhanced security

Intelligent network configuration

Breaking copper's 90m limit

Redundancy
