LANMARK-OF TIGHT BUFFER INDOOR 2X MULTIMODE 50/125 BI OM4 PLENUM, OFNP

Aginode Ref: N177.020NP

- Tight Buffer Indoor optical fiber cables Indoor cable
- Aramid yarns for ease of installation
- Design for direct termination and splicing
- 2 fibers
- Bending Insensitive Fibers for OM4 cables

Application

The LANmark-OF Tight buffer Indoor has 900 um buffered fibres. This second coating till 900 um provides additional protection of the fibres and facilitates the handling when terminating the fibres in a patch panel. The easy strip tight buffer design allows stripping the fibre over 10 cm in one action. The LANmark-OF Tight buffer Indoor is most suitable for direct termination by either anaerobic or hot melt connectors. The tight buffered fibres can also be terminated with splicing of pigtails. The dry structure of the LANmark-Of Tight Buffer Indoor allows both vertical and horizontal installations. It complies with the indoor fibre requirements. The cables can also be installed in a duct by pulling.
