STANDARDS

ISO/IEC 11801

Patch Guides

The Aginode patch guide range enables orderly patch cord storage. All the Aginode accessories are guaranteed to maintain the required bending radius for patch cords which in turn ensures superior data transmission for the installation. The paint finished metal accessories provide improved stability.

The 1HU patch guide comes with a front plate. The 74mm depth provides for the bending radius and enough storage space for the patch cords. Black is also available for the same design.

All drawings, designs, specifications, plans and particulars of weights, size and dimensions contained in the technical or commercial documentation of Aginode is indicative only and shall not be binding on Aginode or be treated as constituting a representation on the part of Aginode.
