

LANsense Next Generation Analyser

LANSENSE NGA TERMINATOR

Aginode Ref: N870.TERM

- Next Generation Analyser - Terminators

Terminators are installed at the end of the Control Bus chain to avoid signal reflections and for the impedance matching of the Control Cables. The terminator looks like an RJ45 plug with no cable.

Terminators are required to be fitted at the last device of a control bus on the main CONTROL OUT port on the 3U Card Cage,
