LANsense NGA Copper Patch Panels

LANSENSE INTERCONNECT MODULAR SNAP-IN PATCH PANEL

Aginode Ref: N881.3112P

- LANsense Intelligent Patch Panel
- On-board intelligence for Interconnect topology.
- Compatible with LANmark EVO connectivity..
- Modular 24 Ports Snap-In patch panel.
- Compatible with Cat 6, Cat 6A, Cat 7A connectors.
- Earthing and bonding features with Aginode exclusive design.
- LANmark EVO modular connectors sold separately.

STANDARDS

ISO/IEC 11801

The LANsense 19" data patch panels carry onboard intelligence, which remains dormant until enabled by LANsense analysers and software. The panels have in-built sensors to detect the connection status of each port and an I/O connector to link to the analysers. This range uses an exclusive Aginode system to install the connectors.

The patch panels are designed for any 19" cabinet and are 1U in height.

Body of the panel is of steel; the panel provides a robust, high-density mounting mechanism for Aginode modular connectors.

All drawings, designs, specifications, plans and particulars of weights, size and dimensions contained in the technical or commercial documentation of Aginode is indicative only and shall not be binding on Aginode or be treated as constituting a representation on the part of Aginode.
