Aginode Ref: N423.641

- Angled 45x45mm module with 1 aperture in Keystone format
- Accommodates Essential-6 and LANmark-6A Unscreened Keystone connectors
- Protective spring loaded shutter
- Compatible with Aginode EU style 45x45 frames
- Colour White

STANDARDS

ISO/IEC 11801

Design and Application

This EU style 45x45mm outlet module can accommodate one keystone connector to support both the Essential-6 and the LANmark-6A Unscreened range. Its angled design allows a 45 degrees position of the connector, ensuring that the cable bend radius is maintained, even in installations where depth is restricted.

The outlet module is glossy white and has a protective spring-loaded shutter.

The 45x45mm module is compatible with Aginode EU style cover plates and with a wide range of 45x45mm frames available in the market.

Installation

The Essential-6 or LANmark-6A unscreened keystone connector can easily be inserted in the module by a simple "one-click" operation.

The modules are packed per box of 20 pcs.

All drawings, designs, specifications, plans and particulars of weights, size and dimensions contained in the technical or commercial documentation of Aginode is indicative only and shall not be binding on Aginode or be treated as constituting a representation on the part of Aginode.
