Accessories

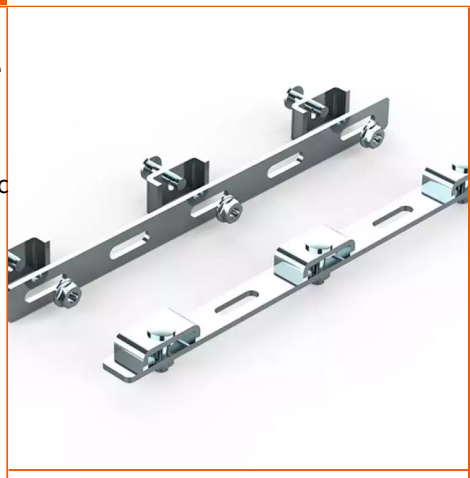

Aginode wire mesh cable trays are designed with advanced sustainability in mind and are welded using high-strength steel bars. The electroplated finish provides a clean, professional aesthetic while ensuring the tray is suitable for open environments and provides effective protection for all cable products. Trays can be custom-cut to fit specific on-site installation requirements.

Enhanced Stability: Features cross-welding for superior stability and reliability, providing robust physical protection for any operating environment.

High Strength: Constructed with 5mm general-purpose steel bars to ensure maximum strength and compatibility with standard market demands.

Universal Design: Utilizes a U-Type universal design for versatile applications and improved matching performance.

Extensive Variety: Available in a wide range of specifications to meet customized requirements for any on-site environment.
