- future class E applications

STANDARDS

ANSI/TIA-568-C.2
EN 50288
IEC 61156-5
ISO/IEC 11801-1

Design

The LANmark-6 F2/UTP cables have AWG 24 solid copper wires. The PE central cross filler helps maintain the stability of the cable geometry and reduces the risk of a reduction in performance when bending the cable. The cables are available with a Dark Grey PVC sheath compliant with IEC 60332-1.

Performance

Tested to 350 MHz and with guaranteed performance to 250 MHz, Aginode LANmark-6 cables exceed the requirements of the International, European and American cable standards, including ISO/IEC 11801, IEC 61156-5, EN 50173, EN 50288 and

TIA/EIA 568-C.2.

Installation

LANmark-6 F2/UTP cables have a shielded construction with a double global foil around the 4 pairs, offering optimal EMC performance. The outer screen is removed when stripping the outer sheath, leaving the inner foil in place with the aluminium side facing outwards. This increases installation efficiency as the foil does not need to be folded back to establish contact with the EMC rear cover of the LANmark connectors.

Guarantees

The LANmark-6 cable performance is guaranteed to meet or exceed the requirements of the above mentioned standards.

Traceability codes on both cable and packaging ensure quality validation of the installed cable.

Installations with LANmark-6 cable and connectivity are qualified for a 25 year full system warranty, which includes Parts, Channel Performance, Application Support and Labour, as described in the Aginode Certified System Warranty.
