ESSENTIAL-OF MICRO TUBE CABLE 96F LSZH SINGLE MODE OS2 G.652.D 9/125 YELLOW

Aginode Ref: N274.MT96Y

- Micro Tube optical fiber cable
- Small, but mechanical strong cable
- Designed for splicing with pigtails
- 96 fibers

Description and Application

The new Micro Tube technology from Aginode allows to manufacture a flexible and small tube. This Micro Tube is the central part of the new “Essential-OF Micro Tube Cable” design, it contains 12 fibers with a fiber diameter of 250 um. Termination of these fibers is done with splicing with pigtails. Up to 8 Micro Tube are arranged around a central strength element. Aramid yarns provide additional strength and make the cable installer friendly. The combination of the Micro Tube technology, the central strength element and aramid yarns result in a mechanical robust, but also small and flexible cable. This makes it an optimized cable for datacenters and backbones.

The small bending radius of the Essential-OF Micro Tube Cable makes the cable easy to arrange in patch panels, in cable trays and in ducts. The Essential-OF Micro Tube Cable complies with the indoor fire requirements. Since there is no drip effect of the very limited amount of gel the cable is optimized for both horizontal and vertical installations.
