- Detachable shutter
- Labelling window
- Angled faceplate
- Supplied with set of labels
- Screws included
- Glossy white finish
- Also available in 2port version

STANDARDS

ISO/IEC 11801

Application

This UK style faceplate is designed to accommodate one LANmark Snap-In connector. It has standard 86 x 86 mm UK dimensions.

2 port version are also available (N800.512) - please refer to the specific datasheets.

Design

Each port is equipped with a spring loaded shutter which protects installed RJ45 connectors against dust when no patch cord is inserted. The faceplate comes in glossy white finish and has a protective labelling window above the port.

The plastic material is UL 94V-0.

The angled faceplate also protects the patch cords and prevents dust entry when the shutters are left open.

Installation

The LANmark Snap-In connector can be easily inserted in the faceplate with a simple one-click operation.

The faceplate is supplied with 2 screws(M3.5X 0.7 - 26MM) for mounting on the wall or containment.
