LANsense NGA Copper Patch Panels

LANSENSE TGA COPPER PATCH PANEL

Aginode Ref: NLS3.CU24B

- LANsense Intelligent Patch Panels
- Modular 24 Ports patch panel
- Compatible with LANmark EVO connectivity.
- LANmark EVO modular connectors and Key Stone clips sold separately
- Earthing and grounding features with Aginode exclusive design.
- Compatible with Cat 6, Cat 6A, Cat 7A connectors
- LED lights on the panel ports for work order management
- Shuttered ports

LANsense copper patch panels carry on-board intelligence, which remains dormant until enabled by LANsense analysers and software. The panels have in-built sensors to detect the connection status of each port and an I/O connector to link to the analysers.

Manufactured from steel, the panel provides a robust, high-density mounting mechanism for Aginode modular connectors.

The Panel comes with LED lights on each port which will assist in work order management, easy patching and patch identification.

The patch panel has shuttered ports that detect insertion and removal of the patch cord.

The panel is available in Black colour and is 1U in size.

STANDARDS

ISO/IEC 11801

All drawings, designs, specifications, plans and particulars of weights, size and dimensions contained in the technical or commercial documentation of Aginode is indicative only and shall not be binding on Aginode or be treated as constituting a representation on the part of Aginode.
