Patch Guides, Blank Panels & Cable Management

1U UNIVERSAL PATCH GUIDE WITH FRONT COVER, WHITE

Aginode Ref: N102.117

- Allows storage and management of copper and fiber patch cords
- High density on 1 U
- 8 cm depth
- Cover for tidy cabinet look
- White paint finished metal

For a correctly managed installation, Aginode offers a full range of cable management accessories to complement our patch panel and cabinet range. The range is suitable for all Aginode Copper and Optical patch panels.

The cable management range is designed for all 19" cabinets.

Patch Guides

The Aginode patch guide range enables orderly patch cord storage. All the Aginode accessories are guaranteed to maintain the required bending radius for patch cords which in turn ensures superior data transmission for the installation. The paint finished metal accessories provide improved stability over plastic guides on the market.

The 1U and 2U universal patch guides are delivered with a front plate. The 8 cm depth provides for the bending radius and enough storage space for the patch cords. Two openings designed at the rear face improve the storage and entry possibilities for patch cords.

An alternative 1U 5-ring metal patch guide is offered. This accessory similarly allows for orderly patch cord management in any installation.
