LANmark Secure Lock Copper Keys

Keys for Secure Lock copper cords and RJ45 Port Blockers

The new range of Lockable copper patch cords and RJ45 port blockers are designed to meet the needs for security of the cabling Infrastructure of Copper systems

Keys for the Secure Lock Copper Patch Cord:

Patch cords come preassembled with either two locking boots or one locking boot version. Once installed the cord is locked in place with the latch inaccessible. The cord can only be disconnected when the matching key is used to unlock the boot. The colour of the Key is Red for Secure lock Patch cords. This key is used to unlock both versions of the patch cords.

Keys for the Secure Lock RJ45 Port Blocker:

The Port blocker keys are available in Black. The same key is used for all the Port Blockers - Red, Blue & Black
