

# LANsense Fibre Patch Cords

## LC DUPLEX LANSense PATCH CORD - OM4

**Aginode Ref:** N884.7LLO2

- Additional copper pin for port detection
- High bandwidth OM4 fibre
- Available with LC connectors

The LC LANSense patch cord uses the standard LC duplex connector, enabling high-density fiber connections to be achieved. The LC LANSense cord, however, has an over-boot to incorporate the sensing capability of the LANSense products. The LANSense patch cords are available in both high bandwidth OM4 and single-mode OS2 fibre types and so offer a comprehensive range of patch cords for interfacing with the latest network equipment.

### STANDARDS

ISO/IEC 11801

# LC Duplex LANsense Patch Cord - OM4

## Characteristics

### 结构特性

颜色	橙
光纤类型	OM4 50/125
连接器类型	LC

### 使用特性

长度	2 m
部件功能	跳线
