ISO/IEC 11801

Application

Aginode LANmark-6 Evo Snap-In connectors are manufactured and tested to the latest Category 6 specifications defined in the International and American cabling standards and are designed to meet or exceed the quality and performance criteria needed to support all applications up to 250 MHz.

- 10 BASE-T Ethernet
- 100 BASE-T Fast Ethernet
- 1000 BASE-T Gigabit Ethernet
- POE Plus (including IEC 60512-9-3 and IEC 60512-99-002)
- Future Class E applications

Design

Aginode LANmark-6 Evo Snap-In connectors are designed to match with LANmark-6 cable and patch cords and to fit all LANmark structural hardware, such as:

- Snap-In patch panels (fixed, sliding and angled) and Zone Distribution Boxes
- Snap-In outlet modules (UK, US, European and German style)

The IDC contacts were conceived to accommodate both solid and stranded wire cables, going from AWG26 to AWG22.

Performance

Aginode LANmark-6 Evo Snap-In connectors meet or exceed the requirements for Category 6 connecting hardware as described in ISO/IEC 11801, IEC 60603-7 and EIA/TIA 568.2-D.

Installation

The wire organiser guarantees fast and easy termination of the LANmark-6 Evo Snap-In connector without the need for a punch-down tool. An optional comfort tool (N420.567) can be used to increase the ease of installation.

Guarantees

The LANmark-6 Evo Snap-In performance is guaranteed to meet or exceed the requirements of the above mentioned standards.

Traceability codes on both connector and packaging ensure quality validation.

Installations with LANmark-6 cable and connectivity are qualified for a 25 year full system warranty, which includes Parts, Installation, Channel Performance and Application Support, as described in the Aginode Certified System Warranty.
